Contents Volume 52

Contents

Editor's corner: On design
R.L. Glass 1

Software development risks to project effectiveness
J. Jiang and G. Klein 3

Breadth-first search oriented symbolic picture representation for spatial match retrieval
C.-F. Lee and C.-C. Chang 11

An on-line scheduling policy for IRIS real-time composite tasks
H. Çam 25

Efficient run-time assurance in distributed systems through selection of executable assertions
M. Schollmeyer and B. McMillin 33

Data dependence analysis for array references
T.-C. Huang and C.-M. Yang 55

Applying stack simulation for branch target buffers
R.-M. Shiu, N.-P. Lu and C.-P. Chung 67

To Kanji or not to Kanji: a cognitive perspective
F.Y. Kuo 79

Editor's Corner: Evaluation and assessment in software engineering
D. Budgen 93

Investigating principles of stakeholder evaluation in a modern IS development approach
P.D.M. Barrow and P.J. Mayhew 95

Quantitative analysis of static models of processes
K. Phalp and M. Shepperd 105

Evaluation of code review methods through interviews and experimentation
M. Höst and C. Johansson 113

The role of comprehension in software inspection
A. Dunsmore, M. Roper and M. Wood 121

A formative evaluation of information retrieval techniques applied to software catalogues
M. Pighin and G. Brajnik 131

Robust estimations of fault content with capture–recapture and detection profile estimators
T. Thelin and P. Runeson 139

An evaluation of the business object approach to software development
M. Tsagias and B. Kitchenham 149

Coupling measures and change ripples in C++ application software
F.G. Wilkie and B.A. Kitchenham 157

Dependability certification of software components
J. Voas and J. Payne 165

Experimental assessment of the effect of inheritance on the maintainability of object-oriented systems
R. Harrison, S. Counsell and R. Nithi 173
